Student Enrollment & Course Management System(SECMS)...

Backlog item:

The Student Enrollment & Course Management System is a comprehensive Salesforce application designed to streamline and automate the academic enrollment operations for educational institute. This system enables administrators, enrollment officers, and instructors to efficiently manage student records, course offerings, enrollments, instructor assignments, approval processes, payments, and reporting—all within a unified Salesforce environment.

1.INTRODUCTION

This project aims to centralize all student, course, and enrollment-related data within a single Salesforce application to ensure easy data access, structured workflows, and accurate reporting. The system allows Enrollment Officers to manage student admissions, course registrations, and communication effectively, while instructors and administrators gain full transparency into course allocations and academic progress. The solution also enables automated instructor assignment, task creation, validation checks, and multi-level approval processes for enrollment management.

Purpose:

1. Accurate student data management
2. Structured enrollment workflows
3. Automated approvals and
4. validations
5. Transparent reporting and monitoring

IDEATION PHASE

Problem Statement(Customer Problem Statement Template)

Empathy Map Canvas

User Persona: Enrollment Officer

- **Think&Feel** :Concerned about double bookings and revenue loss
- **Hear** :Complaints from students and management
- **See** :Multiple spreadsheets and emails
- **Say&Do** :Rechecks data, follows up manually
- **Pain** :Duplicate entries, approval bottle necks
- **Gain** :Automation, dashboards, faster processing

Brainstorming & Idea Prioritization

2. REQUIREMENT ANALYSIS PHASE

- Awareness & Registration
- Course Selection
- Enrollment Request
- Fee Payment
- Approval
- Instructor Assignment
- Reporting & Completion

Solution Requirements

Functional Requirements

FRNo	Epic	Description
FR-1	Student Management	Manage student records
FR-2	Course Management	Create and manage courses
FR-3	Enrollment Processing	Request,approve,reject enrollments
FR-4	Instructor Assignment	Auto-assign instructors
FR-5	Reporting	Dashboards and reports

Non-Functional Requirements

NFR-1:Usability

NFR-2:Security

NFR-3:Reliability

NFR-4:Performance

NFR-5:Scalability

NFR-6:Availability

Milestone 14 : Conclusion

Milestone1-Salesforce:

Introduction:

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you.

Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster. As you work toward your badge forth is module, we'll take you through these features and answer the question, "What is Salesforce, anyway?".

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud. So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organized something like this:

<https://youtu.be/r9EX3IGde5k>

Activity1:Creating Developer Account:

Creating a developer org in salesforce.

Go to

<https://developer.salesforce.com/signup>Onthesignupform,enterthefollowingdetails:

Developer Edition with Agentforce | Inbox (56) - angelbharathi2503 | +

salesforce.com/products/free-trial/developer/

Build enterprise-quality apps fast and get hands-on with Agentforce and Data Cloud.

Sign up for your Developer Edition.

- ✓ Build apps fast with drag-and-drop tools
- ✓ Go further with Apex code
- ✓ Build AI agents with Agentforce
- ✓ Harmonize your data with Data Cloud
- ✓ Ground Agentforce with structured and unstructured data
- ✓ Integrate with anything using APIs

Sign up for your Developer Edition

A free Salesforce Platform environment with Agentforce and Data Cloud

First name: Angel Bharathi ✓

Last name: J ✓

Job title: student ✓

Company: shanmuga industries arts... ✓

Country/region: India ✓

Work email: angelbharathi2503@gm... ✓

☒ I agree to the [Main Services Agreement – Developer Services](#) and [Salesforce Program Agreement](#)

Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure.

I acknowledge, as described in the Developer Documentation: (1) the Developer Edition includes autonomous and other generative AI features: and (2) Salesforce may limit use of

Activity2:Account Activation:

1. Goto the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account
3. Give a password and answer a security question and click on change password.

A screenshot of the Salesforce "Change Your Password" form. The title "Change Your Password" is centered at the top. Below the title, the text "Enter a new password for lead@sb.oom. Make sure to include at least:" is displayed. Three green checkmarks indicate password requirements: "8 characters", "1 letter", and "1 number". Below these, there are two password input fields. The first is labeled "* New Password" and has a "Good" status indicator. The second is labeled "* Confirm New Password" and has a "Match" status indicator. Below the password fields, the "Security Question" section is shown with a dropdown menu currently displaying "In what city were you born?". Below the security question, there is an "Answer" input field containing the text "Vizupuram". At the bottom of the form, there is a blue button labeled "Change Password".

4. Then you will redirect to your salesforce setup page.

Mass Transfer Approval Requests

▼ Feature Settings

Approval Settings

▼ Process Automation

Approval Processes

Didn't find what you're looking for? Try using Global Search.

SETUP

Approval Processes

Open Approvals App

Approvals are complex business processes that require information gathering and planning before implementing. It is recommended that you follow the instructions below before getting started.

1. Read the help topic
2. View the checklist
3. Create a custom user hierarchical relationship field
4. Create email templates
5. Create an approval process using either the Jump Start or Standard Wizard
6. Add Approval History Related List to all page layouts
7. Activate the process to deploy to your users

Manage Approval Processes For: Enrolment

A listing of both active and inactive approval processes for Enrolment is displayed below. To create a new approval process, click Create New Approval Process then select Use Jump Start Wizard to set up your approval process in a few short steps. Or, select Use Standard Wizard to configure all approval options.

Create New Approval Process ▼

Use Jump Start Wizard

Use Standard Setup Wizard

Approval Processes

New Approval Process

Enrolment

Step 1. Enter Name and Description

Enter a name and description for your new approval process.

Enter Name and Description

Process Name

approval enrolment request

Unique Name

approval_enrolment_request

Description

approval process for enrolment request - sends training manager

Approval Processes

Step 2: Specify Entry Criteria

If only certain types of records should enter this approval process, enter that criteria below. For example, only expense reports from employees at headquarters should enter this process.

Specify Entry Criteria

Use this approval process if the following criteria are met :

Field	Operator	Value	
Enrolment: Enrolment Status	equals	Requested	AND
--None--	--None--		AND
--None--	--None--		AND
--None--	--None--		AND
--None--	--None--		

Step 3: Specify Approver Field and Record Editability Properties

Step 3 of 6

[Previous](#) [Next](#) [Cancel](#)

When you define approval steps, you can assign approval requests to different users. One of your options is to use a user field to automatically route these requests. If you want to use this option for any of your approval steps, select a field from the picklist below. Also, when a record is in the approval process, it will always be locked-- only an administrator will be able to edit it. However, you may choose to also allow the currently assigned approver to edit the record.

Select Field Used for Automated Approval Routing

Next Automated Approver Determined By Manager i

Milestone11–Reports:

Activity1:Create“Students by Status”Report

Activity2

Activity3:Create“ Pending Enrollment Approvals”Report

Activity4:Create“Revenue Report(FeesPaid)”Report

Milestone12–Dashboards:

Activity 1: Create "Student Management Dashboard"

The screenshot displays the Salesforce user interface. At the top, the navigation bar includes 'Service', 'Home', 'Chatter', 'Accounts', 'Contacts', 'Cases', 'Reports', 'Dashboards', 'Student', 'Instructors', and 'Enrolment | Flow'. The 'Dashboards' tab is selected, showing a 'Recent' section with one item. Below this, the 'Student Management Dashboard' is visible, titled 'Student Enrollment & Cou...'. The dashboard includes a search bar, a 'Developer Edition' label, and a 'Search...' input. The main content area features three widgets: 'Students by Status' (a bar chart showing 1 record for 'Applied' and 'verified' statuses), 'Revenue Report – Fees Paid.' (a message stating 'No data. Try refreshing the dashboard.'), and a table for 'angel' (listing student details: Student N..., Email, and phone). The table data is as follows:

Student: Student N...	Email	phone
Angel	angel@student	8610425
Deva	deva@student	6754328
jessy	jessy@student	6754381

At the bottom of the dashboard, there are links for 'View Report (Students by Status)', 'View Report', and 'View Report (angel)', along with a timestamp 'As of Mar 7, 2026, 12:19 AM'.

Click **Save** → **Done**.

ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data
- Automated workflows
- Real-time reporting

Disadvantages

- Salesforce dependency
- Requires initial configuration effort

Conclusion:

The Salesforce Student Enrollment & Course Management System successfully streamlines the entire student academic lifecycle—from student registration and course creation to enrollment management, instructor assignment, approvals, revenue tracking, and reporting.

By leveraging Salesforce's automation tools such as validation rules, flows, approval processes, and dashboards, the system improves data accuracy, operational efficiency, and decision-making. This project demonstrates how Salesforce can transform manual academic processes into a scalable, reliable, and user-friendly digital solution.

Key Performance Indicators (KPIs)

- Total student enrollments per semester.
- Course popularity based on enrollment count.
- Revenue generated through course fees.
- Approval processing time for enrollments.
- Number of pending enrollment requests.

Risk Management

- Data Entry Errors – mitigated using validation rules.
- Unauthorized Access – prevented using role-based security and permission sets.
- System Downtime – reduced using Salesforce cloud reliability.
- Data Loss – minimized through automated backups.

Sample Test Cases

- Verify student record creation with valid details.
- Validate rejection of incorrect email domains.
- Confirm that enrollment cannot be approved without fees paid.
- Check automated instructor assignment based on course category.
- Ensure email notification is sent after enrollment approval.

Glossary

- SECMS – Student Enrollment & Course Management System.
Enrollment – Process of registering a student in a

course.

- Approval Process – Salesforce automation for record approval.
- Flow – Salesforce automation tool used for business logic.
- KPI – Key Performance Indicator used to measure system success.

Implementation Benefits

- Improved operational efficiency.
- Better student experience.
- Centralized academic data management.
- Faster administrative decision making.
- Scalable solution for growing institution

THANK YOU
